EURABELT FUELS LTD

Verification Infrastructure for a Diversified Import Portfolio

Executive Brief · The Government of the Republic of India · September 2026

THE SITUATION

India is the most import-exposed of the world's major economies to the events of 2026, and responded with portfolio diversification of remarkable speed. Approximately 52% of India's roughly 5 million b/d of crude imports transited the Strait of Hormuz at the point of disruption, up from around 41% in 2025.

Within four months the sourcing mix had been substantially rebuilt. Total inflows reached a record ~5 million b/d in June, of which 2.6 million b/d came from Russia — 54% of imports, more than double February's 1.1 million b/d. Venezuelan-origin cargoes were drawn in as near-term replacement, with 12.4 million barrels in transit for Sikka discharge in April alone. Purchases were stepped up from the United States and West Africa.

That response kept Indian refineries at high utilisation while comparable Asian refiners faced feedstock constraints, and the accompanying paper treats it as the achievement it was. Its compliance consequence follows arithmetically: a portfolio assembled at speed from more origins, through more intermediaries, has materially more counterparty surface — and those origins are treated differently by Washington, Brussels, London and Ottawa, on different timetables.

52%
Share of Indian crude imports transiting Hormuz at disruption

2.6 mb/d
Russian supply in June 2026, 54% of total imports

25% by 2027
India's statutory electronic bill of lading adoption milestone

WHAT EURABELT IS

Eurabelt Fuels Ltd is a petroleum procurement compliance and verification institution, independently registered in four jurisdictions — the United Kingdom, Canada, Trinidad & Tobago and South Africa. We do not take title to cargo, do not trade on our own account, and hold no commercial position in any transaction we verify. Our function is to onboard and verify buyers and sellers, match verified principals, and monitor the structuring of the transaction that follows. The parties negotiate and execute through their own commercial and legal teams.

We operate six interlocking systems: a staged deal pipeline with role-based access across eight participant types; a Digital Cargo Passport applying SHA-256 integrity hashing at each stage; automated fraud-pattern detection; sanctions screening against six jurisdictional regimes (US OFAC, EU CFSP, UK OFSI, Canada SEMA, the UN Security Council Consolidated List and Australia's sanctions list); a Document Vault using AES-256 encryption and Argon2ID key derivation; and a standalone multi-factor authenticator.

HOW THE MODEL WORKS

FOUR STRUCTURAL COMMITMENTS

Onboard once, verified continuously. A counterparty completes onboarding one time. That record then serves every subsequent transaction across all four jurisdictions, maintained by automated monitoring rather than repeated re-submission. The administrative burden is retired permanently; the assurance is not.

No charge for onboarding or verification. No onboarding, registration, documentation, access, annual or re-verification fee, at any stage. The dominant fraud typology in petroleum procurement is the advance fee; an institution that charges nothing for onboarding cannot operate that model.

Verified principals matched directly. A verified buyer is introduced to a verified seller, with no intermediary chain and no participant unknown to the other side. Eurabelt holds no position in the transaction that follows.

No discretionary approval. Compliance determination is generated by the system from submitted documentation against defined policy. No individual, at any level, can pass a counterparty whose documents failed or fail one whose documents passed. Verified documentation is the sole qualifier.

THE FOUR JURISDICTIONS, AND WHY THEY MATTER TO INDIA

Jurisdiction	Why it matters here
United Kingdom	Governing law and marine insurance market for most Indian crude contracts; OFSI distinct from EU and US regimes
Canada	SEMA as a fourth independent regime; publicly searchable federal beneficial-ownership register
Trinidad & Tobago	**Most immediately relevant** — provenance verification in the corridor India entered at scale in 2026
South Africa	BRICS and IBSA partner; verification at source for West African crude, a growing part of India's mix

WHAT WE ARE PROPOSING

We are not proposing a study, a pilot or a concept. The infrastructure is built, registered and operating, and we are asking for the opportunity to deploy it. Specifically, we are seeking: to serve as the compliance and verification institution for entities transacting within or through this market; to provide verification capacity to state entities, national oil companies and public procurement bodies; to support smaller participants through onboarding performed once and without charge; and to establish a durable institutional relationship measured in decades.

We hold no existing relationship with the Government of India, the Ministry of Petroleum and Natural Gas or any Indian public sector undertaking and claim none. What we ask is a meeting and the chance to demonstrate the platform. We will travel at our own cost, present to any level of technical scrutiny, and provide any documentation or independent review requested. Questions we would welcome:

- Whether rapid diversification is understood to expand counterparty surface in the way we describe.
- How regime divergence is currently navigated — the practical question is never simply whether a counterparty is sanctioned, but by whom, and whether that regime is implicated by the financing, insurance, flag and clearing arrangements actually used.
- How the hybrid interval before the Bills of Lading Act milestones is being managed.

INDEPENDENT VERIFICATION

Every registration below can be checked without reference to us. Our registrations are identification and eligibility records — they are not endorsements, accreditations or certifications by any government or organisation, and we do not present them as such.

Jurisdiction	Company Reg.	NCAGE	SAM.gov UEI	Verify at
United Kingdom	16639303	U2E57	E1JDP3L371Y7	Companies House
Canada	17303785	L11R0	E2LRX73E1YY5	Corporations Canada
Trinidad & Tobago	10017296	STDY6	E34CYFW5MR93	Registrar General
South Africa	K2025/850330/07	STDZ3	E3N2GFF8FQG1	CIPC
Data controller registration — ICO reference ZC076060				ico.org.uk

NCAGE codes are verifiable through the NATO Codification Tool at eportal.nspa.nato.int and SAM.gov UEIs at sam.gov. A full statement of what each registration does and does not signify appears at Section 5.3 of the accompanying white paper.
